

# IT/Automation Engineer

Do you like to do what you are best at every day - and do you prefer innovative challenges over admin routines?

If you also have profound technical experience within IT/Automation systems in the pharmaceutical industry and know how to use it to specify, design and implement the right technical solutions in complex projects, you should continue reading.

## JOB BRIEF

We are a fast-growing market leading pharmaceutical consultancy specialized in IT and automation systems. And we consider it our main cause to deliver state-of-the-art technical solutions that enable the world's best pharmaceutical companies to produce lifesaving pharmaceuticals for patients all over the world.

As an IT/Automation Engineer with Trust GMP, you will work with implementation of the latest technologies and be part of a dynamic growth company with a flat organization and high degree of trust and independence.

## THE POSITION

Depending on your personal motivation, you can develop new pharmaceutical IT/Automation software solutions, or you can be the IT/Automation technical expert taking care of requirement specifications, design review, validation etc.

In your role as the technical IT/Automation expert working closely with experts on other areas you will ensure successful integration of systems, equipment, processes, and procedures and to always create the most value for our customers. In other words, you will be connecting the dots.

In time you will grow into the role as the IT/Automation lead in high priority projects in charge of defining IT/Automation strategies and using your experience to implement systems ready for the operational phase of the equipment life cycle.

Your responsibilities will be:

- IT/Automation expertise in small to large IT/Automation projects to support e.g.:
  - Requirement specifications
  - Software development
  - Design review
  - FAT/SAT
  - Implementation
  - Validation
  - Handover to operation

## QUALIFICATIONS

Technical qualifications

Trust GMP ApS  
Furesøparkalle 22  
DK-3460 Birkerød

**TRUST.** G M P

- You most likely hold a B.Sc. or M.Sc. in electrical engineering specialized in IT/Automation or similar
- You have minimum 3 years of relevant experience with operation, maintenance, or programming in one or more of the following systems:
  - iFix, Siemens PLC/HMI, Sattline, 800xA, DeltaV, LMES, PAS-X or Serialization systems
- Experience with pharmaceutical processes is an advantage
- Fluent in English and Danish - both spoken and written

**Personal qualifications:**

- You have a welcoming, proactive, and solution-oriented approach and like to share knowledge with your team, understanding that IT/Automation can be a difficult discipline to share
- You make decisions by having one eye on the details and the other on the broader surroundings and long-term goals
- You have a natural urge to always look for smarter ways to do things
- Various assignment and project environments keep you sharp
- Team events, small talk and social activities give you energy
- You generally thrive in a hectic everyday life with more questions than answers and in finding possibilities in the unknown

## WE OFFER

At Trust GMP we offer a dynamic, flexible, and ambitious work environment and a fun and friendly work spirit. We want to do things differently, so we have eliminated all unnecessary bureaucracy and let the management team take care of pitching and admin work, so you instead can take care of what you are best at.

We have a solid high-quality market brand and are known for nurturing long term customer relations based on trust with world leading pharmaceuticals. And we can therefore guarantee you great both professional and personal development opportunities. The daily work is based at our customer or at home, which allows us to spend the office expenses on team and social family events, something we prioritize highly.

In Trust GMP we work as a team, and you can always count on having passionate, skilled, and knowledgeable colleagues to spare with.

Trust is a fundamental value to us. We build our business on trust in our colleagues, customers, and business partners just as we always strive to enable everyone to trust in us.
